## UP Health System, Marquette

UP Health System Marquette, located in the Upper Peninsula of Michigan, one of Duke Lifepoint's hospitals needed to replace their legacy EHS system. They sought a solution to manage the employee health compliance of a 2,500 strong workforce that is cloud hosted, designed with the latest technology, easy to use, highly flexible and configurable, paperless, mobile friendly, quick to implement and affordable. Upon completion of an extensive evaluation, they chose the solution that met all their criteria and more, they chose Immuware.

For more information or a demo of [Immuware](https://www.immuware.com), contact us at [info@immuware.com](mailto:info@immuware.com) , via phone (312) 505-1443 or on our website, [Immuware.com](https://www.immuware.com)

With Immuware's Employee Portal, UP Health's employees will have access to Immuware 24 / 7 and be able to do the following online:

- Pre-consent
- Electronically sign
- Complete questionnaires
- Self-upload immunization, surveillance and certification documents
- View and print a full summary record history
- View custom message banner notifications

To streamline the process even further, UP Health has integrated employee ID badge scanning, thereby allowing Immuware to quickly identify the employee and pull up their record without manually entering any data.

### **Richmond University Medical Center**

The goal of Staten Island New York's largest healthcare system, [Richmond University Medical Center](#) was to quickly implement a best-in-class, cloud-hosted employee health compliance technology for their 2018 flu season. They needed a flexible, easy-to-use, and highly configurable and interoperable system that would improve their reporting and compliance rates.

Immuware met all of their requirements, including transparency and real time reporting, including multiple summary aggregate dashboards, intuitive drill downs, and easy "slice and dice", filter and sort capabilities. Immuware will be a key enabler for Open Door to implement best practices, increase quality of their services and improve and streamline processes.

## Jennings American Legion Hospital

[Jennings American Legion](#) Hospital had been reviewing and considering investing in a new EHS for several

months. Their employee health leader presented a compelling and financially sound business case to their executives for the purchase of Immuware. With Immuware, Jennings will have a fully automated paperless process for tracking and reporting of Influenza, Tuberculosis, Varicella, Hepatitis B & C, HIV, Tdap, MMR, Respirator Fit Testing, Bloodborne Pathogen Exposures and other employee health data for

their workforce. They will also be migrating all historical records, thereby creating a single employee health database that is securely stored and maintained on the cloud. Jennings now has access to all data as far back in time as needed, with just a few clicks.

Immuware is hosted on the highly secure Microsoft® Azure platform with built-in HTTPS, it supports custom domains with custom SSL certificates for even finer security and strong passwords are enforced for user logins.

The selection of Immuware aligns closely with one of the main tenets of Jennings American's mission: to lead with innovation. By reducing their time spent on administrative tasks, Immuware helps to free up time for caring with compassion and healing those who need it in the Jennings, Louisiana community.

## Open Door Family Centers

[Open Door Family Centers](#) is committed to serving patients who seek affordable, culturally competent and comprehensive healthcare in New York's Westchester and Putnam Counties, and consistently surpasses national benchmarks for patient outcomes. Nearly 1,000 patients receive care at ODFC every day via their Family Medical Centers, five School Based Health Centers and two Mobile Dental Vans.

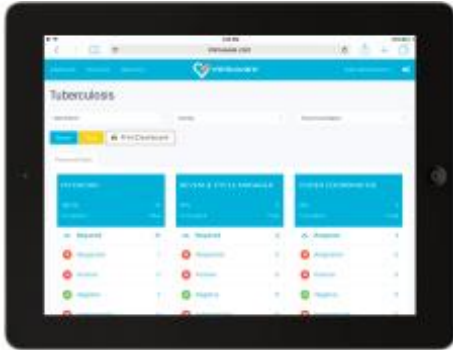

The Open Door team underwent an extensive evaluation of the industry's leading systems before deciding on Immuware. Open Door is using Immuware to track Influenza, Tuberculosis, Physical Health Screenings, Varicella, MMR, Hepatitis B & C, Tdap, HIV, Respirator Fit testing and Injury tracking.

Open Door has also integrated their lab results from BioReference Laboratories' 113 locations in the NY tri-state area with Immuware, leading to increased efficiency, more timely reporting and easier access to real time compliance results.

### SimpliVerified Partnership

In addition to our new clients, we are proud to announce our partnership with [SimpliVerified, Inc.](#), one of the leading background check companies, based in Utah. We have partnered with Immuware to provide their customers a leading-edge platform to capture, store, review, validate and report medical documentation required by universities and employers during the recruiting process.

"We are honored to have been selected by SimpliVerified and are excited about this new long-term partnership with such an innovative and respected company. This opens the door for us to offer Immuware to a broad segment of customers and capitalize on SimpliVerified's well-known name and expertise" commented Rai Fischer, Carminati Consulting.

### **Nightingale College of Nursing**

The [Nightingale College of Nursing](#), located in several states in the northwest US, was ready to upgrade to a cloud-hosted system for their students' compliance. They sought a modern and a well-organized user interface, more functionality and improved reporting. After exploring their options, they chose the combination of SimpliVerified and Immuware to provide a complete centralized solution for recording, storing and reporting annual compliance, including background checks, immunizations and vaccinations, CPR certifications and other educational institution requirements.
